

DIGITAL CAR PARK MANAGEMENT SOLUTION

Smart Parking

THE CHALLENGE

A car park without a system is unmanageable.

Physical identification impossible

Without a digital system, locating a specific vehicle in a car park with hundreds of spaces is a critical waste of time for your on-site teams.

Significant time wasted

Each manual search can take 10 to 20 minutes. With dozens of transfers every day, this amounts to several hours of unproductive work per day.

Manual synchronisation

Communicating movements between the field and your management system leads to errors, duplicates and delays in daily reporting.

OUR SOLUTION

A platform operational from day one.

Real-time Tablet Interface

Interactive 2D map of the car park showing real-time space availability. The attendant scans or enters the vehicle using its registration number, VIN or internal reference within seconds. Compatible with Android and iOS.

Key & Tag System

Each space is assigned a unique identifier (e.g. 22B = Tag 22, Blue Zone). Instant location tracking of any vehicle in the car park. Quick entry upon arrival/departure.

Automatic Intranet Synchronisation

Every arrival/departure is instantly transmitted to your intranet API via real-time webhooks. Secure Bearer Token authentication with end-to-end encryption.

Dashboard & Daily Reports

Monitoring of occupancy rates, complete history of movements (Parking Stay), daily transaction reports and centralised pricing configuration. Scalable multi-site architecture.

RETURN ON INVESTMENT

Hard figures for your business.

<p>15 mins</p> <p>Saved per transfer (vs ~20 mins manually)</p>	<p>70%</p> <p>Reduction in data entry errors</p>	<p>5+</p> <p>Saved per day (on 20+ transfers)</p>	<p>< 6 months</p> <p>Return on investment</p>
----------------------------------------------------------------------------	---------------------------------------------------------	----------------------------------------------------------	---------------------------------------------------------

Calculation assumptions

Based on 20 transfers per day, the saving amounts to more than 5 hours of field agent time per day, or ~100 hours per month. At the average hourly cost of a logistics agent (≈ €20/hour), this represents a monthly saving of €2,000 — meaning a positive ROI from the very first month of use.

PRICING

Transparent, predictable, no surprises.

SETUP — One-off cost From €900 excl. VAT (€1,089 incl. VAT)

€3.00 excl. VAT per seat · minimum 300 seats · configuration, staff training and API integration included · payable upon signing the contract.

Price excl. VAT — 21% VAT applicable — Monthly billing via SEPA direct debit.

DEPLOYMENT

Let's get started together.

Up and running in 4 weeks.

01 WEEK 1 — Offer validation

- Confirmation of scope: number of locations, site map, intranet API access.
- Signing of the service contract (minimum term: 24 months, automatically renewable for 12 months).
- Payment of installation fees (€3 excl. VAT × locations, min. 300 spaces). Installation will only commence upon receipt of full payment.

02 WEEKS 2–3 — Integration & Pilot Deployment

- Configuration of the platform, creation of locations and zones, intranet API integration.
- Training of field staff on the Android/iOS tablet interface.
- Synchronisation testing and operational validation.

03 WEEK 4 — Go-Live

- Full activation across all locations. Operational intranet synchronisation.
- Daily reports active. Support included.
- Monthly billing commences on the actual installation date.

WHY KRAKENTO

Our commitments.

- ✓ A Belgian company based in Uccle, with support provided entirely in French.
- ✓ Proven tech stack: Laravel 12, Livewire 3, Laravel Nova, Redis. 140+ unit tests, 100% pass rate.
- ✓ Security & GDPR compliance (EU 2016/679 + Belgian law 30/07/2018). Role-based authentication, audit trail, end-to-end encryption.
- ✓ Extensible multi-site architecture. Drag-and-drop visual editor and planned multi-site deployment (Phases 2–3).
- ✓ Best efforts obligation. KRAKENTO's liability limited to direct damages related to the services defined in the contract.
